## **Approach to Counseling**

I use an eclectic approach to counseling utilizing a variety of approaches including Rogerian Client Centered Therapy, Psychodynamic, and Gestalt Therapy. My main focus is to utilize Experiential Therapy. This approach believes that experience is formative and it is experience that is transformative. I will attempt to help the client create experience in their life that will provide healing. Because of this approach I try to give the client a structure and framework to work within. I often create assignments for the client to try in their life and report back upon to see what the effect was. I try to meet the client's therapeutic needs based upon where they are in their healing process.

## **Risks, Benefits, and Course of Counseling**

Counseling is understood to be a service which is voluntarily chosen by you among viable options such as other centers, support groups, self-help resources, and medical treatment. As with other forms of treatment there is a risk that your symptoms may worsen before improving, fail to improve, or continue to worsen. Some clients need only a few sessions to achieve their goals and others may need months, or even years to improve. The progress of counseling is reviewed with the client periodically to assure it is being helpful. You have the right to terminate counseling or request to be referred to another professional at any time. However premature termination may result in the return or worsening of the initial problems or symptoms.

I abide by the laws and ethical principles that govern privilege and confidentiality. I will not disclose to anyone anything you tell me, not even the fact that you saw me, without your written permission via a signed release of information form.

There are a few exceptions to these standards:

1. It is legally required that your counselor act to prevent physical harm to yourself or others when there is a "clear and imminent" danger of that happening.
2. Your counselor is legally required to report cases of ongoing abuse of a child, elder, or disabled person.
3. If you are requesting to use insurance, your counselor may be required to release clinical information regarding you to insurance carriers as required for payment or review of your claim.
4. Your counselor may have to release records when ordered by a court subpoena.
5. Your counselor has regular supervision with other professionals. Your counselor will only disclose that information necessary to get help required.
6. For Child Protective Services case planning (RCW 26.44.030)
7. In a medical emergency.

## **Contact and Emergencies**

If you have an emergency after hours call the Clark County Crisis Line at 696-9560 or 911 or go to the nearest hospital emergency room.

## Email and Text (SMS) Messaging Informed Consent

If you would like to be communicated with by email or text message, I need to make sure you are aware of the confidentiality and other issues that arise when we communicate this way and to document that you are aware of these terms and agree to them.

I understand that all email messages are sent over the Internet and are not encrypted, are not secure, and may be read by others. I understand that my email communications with my therapist will NOT be encrypted and, therefore, my therapist can NOT guarantee the confidentiality and security of any information we send via e-mail. I understand that SMS messages are even less secure than email, and the same conditions apply. I understand that for this reason my therapist has advised me not to send sensitive information via email or SMS message. This includes information about current or past symptoms, conditions, or treatment, as well as identifying information such as social security numbers or insurance identification information.

By signing below I hereby give permission for my therapist to reply to my messages via email, including any information that my therapist deems appropriate, that would otherwise be considered confidential. I agree that my therapist shall not be liable for any breach of confidentiality that may result from this use of email via the Internet.

I understand that my therapist will limit SMS messages to brief inquiries or responses regarding scheduling. I understand that my therapist may at times email me information about resources that I can use as part of my treatment. I hereby consent to receive such information via email. I understand that e-mail and SMS communication should not be used for urgent or sensitive matters since technical or other factors may prevent a timely answer. I understand that if I use email or SMS to make or request scheduling changes it is my responsibility to confirm that my therapist has received my communication more than 24 hours before the appointment time being changed. If I believe I need a response within 48 hours, I will not use email but will call my therapist. If I do not receive an answer to a routine email or text message within two working days, I understand that I should call my therapist. I understand that all email and SMS communications may be made part of my permanent medical record and would be accessible to anyone given access to those records. I also understand that I may withdraw permission for my therapist to communicate with me via email or SMS by notifying my therapist in writing.

## TeleHealth Informed Consent

I am aware of my options for doing sessions via telehealth or in-person.

I understand how the video conferencing technology will be used to affect such a session, and will not be the same as a direct/client/therapist visit due to the fact that I will not be in the same room as my health care provider.

I understand there are potential risks to this technology, including interruptions, unauthorized access and technical difficulties. I understand that the telehealth system being used is a HIPPA compliant platform and have been offered this platform as the most secure option to perform the telehealth session. I understand that my therapist or I can discontinue the telehealth session if it is felt that the video conferencing connections are not adequate for the situation.

I understand that billing will occur to my insurance company as a telehealth session using the same confidentiality practices as all other sessions. I understand that it is my responsibility to ensure that my health insurance plan covers telehealth sessions and that I will be financially responsible for payment of the session in the case that my insurance does not provide coverage for this service, or if it only covers a portion of the cost.

I have had a direct conversation with an employee of A Better Way Counseling Service, during which I had the opportunity to ask questions in regard to this procedure. My questions have been answered and the risks, benefits and any practical alternatives have been discussed with me in a language in which I understand.
